

AP 1311: Social Media for Learning

Background

The district is committed to ensuring that all students and staff, who utilize social media technology for professional purposes, do so in a safe and responsible manner. The District strives to create professional social media environments that mirror the academically supportive environments of our schools.

Social media technology can serve as a powerful tool to enhance education, communication, and learning. This technology can provide both educational and professional benefits, including preparing district students to succeed in their educational and career endeavors.

These procedures provide direction regarding recommended practices for professional social media communication amongst district employees, as well as social media communication between district employees and students.

In recognition of the public and pervasive nature of social media communications, as well as the fact that in this digital era, the lines between professional and personal endeavors are sometimes blurred, these procedures also address caveats for use of personal social media by staff.

These procedures do not address student-to-student communication via social media. Each principal will provide instructions that are specific to student use of technology and social media.

These procedures apply to all district employees at all locations.

Definitions:

Social media: any form of online publication or presence that allows interactive communication, including, but not limited to: social networks, blogs, internet websites, internet forums, and wikis. Examples of social media include, but are not limited to: Meta, X, YouTube, and Snapchat.

Professional social media: a work-related social media activity that is either support-services based or school based (e.g., a District principal establishing an Instagram page for their school or a District teacher establishing a blog for their class).

Personal social media: a non-work-related social media activity (e.g., a District employee establishing a Facebook page or X account for their own personal use).

Procedures:

1. Professional Social Media Use

1.1. Maintenance of Separate Professional and Personal E-mail Accounts

- 1.1.1. District employees who decide to engage in professional social media activities must maintain separate professional (district email) and personal email

addresses (Gmail, etc). As such, district employees must not use their personal email address for professional social media activities and vice versa. The professional social media presence will utilize a district email address and must be completely separate from any personal social media presence maintained by the district employee.

1.2. Communication with District Students

District employees who work with students and communicate with students through professional social media sites will follow these procedures:

1.2.1. Professional social media sites that are school-based will be designed to address reasonable instructional, educational or extra-curricular program matters:

1.2.1.1. On school-based professional social media sites that involve district students, district employees will use the sites for professional purposes only.

1.2.1.2. District employees are not to review any personal social media accounts created by their students.

1.2.1.3. District employees will keep their social media accounts current and delete content or sites no longer in use.

1.2.2. Professional social media sites that are non-school based will be aligned to the mission and function of the District.

1.2.3. District employees will inform their supervisor before setting up a professional social media presence and acknowledge they have read and understood AP 1201 Acceptable Use of IT, Appendix 1201 A Staff Permission for Access to ICT Form, Appendix 1201 B Student Permission for Access to ICT Form, and Appendix 1201 C Student Media Website Consent.

1.2.4. Professional district social media sites are to include language identifying the sites as professional social media district sites. For example, professional sites identify the district school, department or particular grade that is utilizing the site and be linked to the school website.

1.3. Guidance Regarding Professional Social Media Sites

1.3.1. District employees will treat professional social media space and communication like a classroom and/or a professional workplace. The same standards expected in district professional settings are expected on professional social media sites.

1.3.2. District employees will exercise caution, sound judgment, and common sense when using professional social media sites.

1.3.3. District employees will use privacy settings to control access to their professional social media sites to ensure that professional social media communications only reach the employees' intended audience. However, district employees are to be aware that there are limitations to privacy settings. Private communication published on the internet can easily become public. Furthermore, social media sites can change their current default privacy settings and other functions.

- 1.3.4. Employees are responsible for understanding the rules of the social media site being utilized prior to utilizing the site.
- 1.3.5. Professional social media communication must be in compliance with existing [District Board Policies and Administrative Procedures](#) and applicable laws, including, but not limited to, prohibitions on the disclosure of confidential information and prohibitions on the use of harassing, obscene, discriminatory, defamatory or threatening language.
- 1.3.6. No personally identifiable student information may be posted by district employees on professional social media sites, including student photographs, without the consent of the students. If students are under the age of consent, their parents must consent.

1.4. Monitoring of Professional Social Media Sites

- 1.4.1. Employees using professional social media have no expectation of privacy with regards to their use of such media.
- 1.4.2. The Principal or Supervisor reserves the right to remove, disable, and provide feedback regarding professional social media sites that do not adhere to the law or do not reasonably align with these procedures.
- 1.4.3. To assist in monitoring, as a recommended practice to the extent possible, the default setting for comments on professional social media sites is to be turned off or moderated regularly. If the default setting for comments is turned on, the comments on the site must be monitored on a daily basis by the user.
- 1.4.4. When establishing professional social media sites, staff will consider the intended audience for the site and consider the level of privacy assigned to the site, specifically, whether the site is to be a private network (for example, it is limited to a particular class or particular grade within a school) or a public network (for example, anyone within the school or a larger group within the District community can participate). It is a recommended practice for professional social media sites to be private networks, unless there is a specific educational need for the site to be a public network.
- 1.4.5. The Principal or Supervisor shall maintain an up- to-date list of social media accounts created including administrative access, username and passwords.
- 1.4.6. Employees shall receive Principal or Supervisor approval prior to setting up social media accounts and platforms.
- 1.4.7. The Principal or Supervisor shall follow the District guidelines on acceptable District approved online applications.

1.5. Media Inquiries

- 1.5.1. Any media inquiries received via professional social media sites are to be referred to the District Communications Manager.

2. Personal Social Media Use

2.1. Communication with District Students

- 2.1.1. In order to maintain a professional and appropriate relationship with students, District employees must not communicate with students who are currently

enrolled in district schools on personal social media sites.

2.2. Guidance Regarding Personal Social Media Sites

Employees are to exercise caution and common sense when using personal social media sites:

- 2.2.1. As a recommended practice, employees are encouraged to use appropriate privacy settings to control access to their personal social media sites. However, be aware that there are limitations to privacy settings. Private communication published on the internet can easily become public. Furthermore, social media sites can change their current default privacy settings and other functions. As a result, employees have a personal responsibility to understand the rules of the social media site being utilized.
- 2.2.2. District employees will not “tag” photos of other employees without the prior permission of the individuals being tagged.
- 2.2.3. District employees will not “tag” photos of any students.
- 2.2.4. Personal social media use, including off-hours use, has the potential to result in disruption at school and/or the workplace, and can be in violation of District Administrative Procedures.
- 2.2.5. The posting or disclosure of personally identifiable student information or confidential information via personal social media sites is prohibited.

3. Events at Schools

- 3.1. Prior to the beginning of an assembly or event that parents are invited, parents will be reminded that no photos, images, or recordings may be taken or posted to social media.

4. Applicability of Board Policies, District Administrative Procedures and other Laws

- 4.1. These procedures provide direction intended to supplement, not supersede, existing Board Policies and Administrative Procedures. Users of professional social media sites are responsible for complying with all applicable federal, provincial and local legislation.
- 4.2. These procedures are not designed to serve as a code of conduct for social media use. However, all existing Board Policies and District Procedures, and legislation that cover employee conduct may be applicable in the social media environment.
